Keep to Talent Whispering is establishing trust. The best begins at the initial contact of what will hopefully develop into a mutually beneficial journey. The initial contact for a prospective employee may come through a recruiter. Leaders within organizations can benefit tremendously from working closely with recruiters to initiate a journey that will include whispering, coaching, and helping the employee transform to a higher level of abilities and fulfillment. I have always found good and close partnerships with the recruiters to be tremendously helpful in setting the stage for the journey.
